ASSA CLIQ® Remote Wall Programming Device

Application:

The wall programming device is an indoor remote programming device that connects to the CLIQ® Web Manager system via Ethernet.
The communication between CLIQ Web Manager, the wall PD and the ASSA CLIQ® Remote key is encrypted for maximum security. The wall PD can be powered with an external power supply or via Power-over-Ethernet.

Specification:

To be used with the ASSA CLIQ® Remote system.

Standards:
