ASSA 960 Strike Body

ASSA 960 Strike Body

Application:

ASSA 960 and 961 electric strikes are ideal for doors with very high security requirements.

They are suitable for both perimeter security and interior applications within education, commercial, health, industrial and residential premises. The 960 electric strikes are particularly suitable for use on metal fire doors.

Specification:

- For internal or external door use.
- Fully compatible with ASSA's range of ASSA Modular and Connect lockcases.
- Dual voltage 12-24V AC/DC.
- Morticing dimensions are the same for all electric strike bodies.
- Optional latch bolt engagement monitoring.
- Symmetrical design to fit Scandinavian double latch locks.
- Reversible and unhandled.
- Holding strength of 1000kg/10kN.
- Steel housing and steel pivoting staple.
- Impact and shockproof design.
- Pre-load technology.
- Built-in transient protection against back EMF.
- 5 year guarantee.

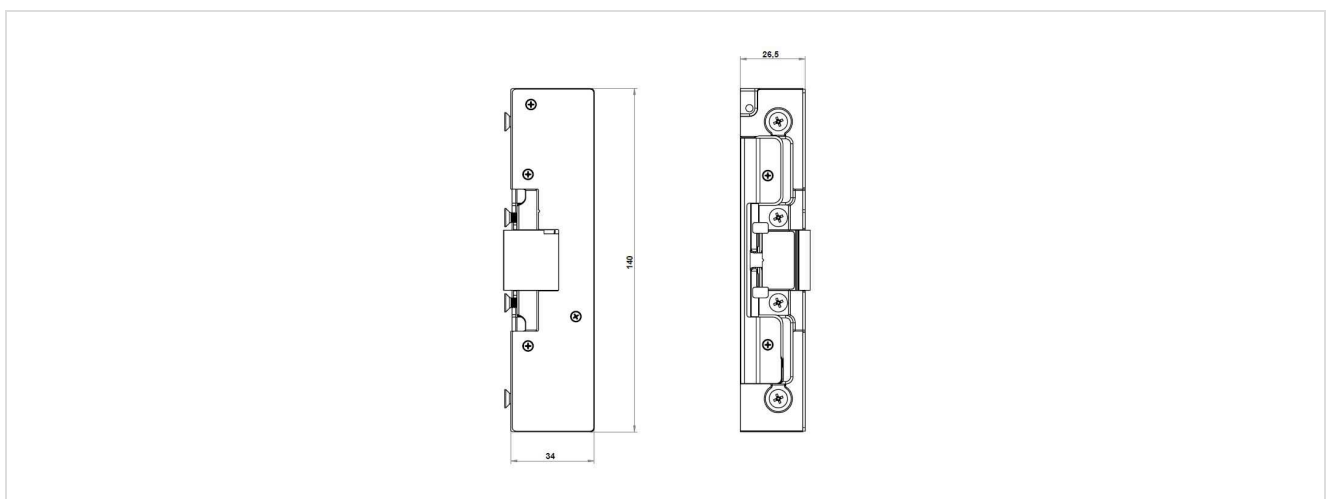

Standards:

- CE Marked and approved for use with other electrical devices.
- Meets requirements of BS EN14846.
- 960 electric strike fire rated for up to 60 minutes for metal fire doors.
- DoP (960) and DoC available at www.assa.co.uk/dop.

Finish:

Stainless steel
