magnetic catch

PLS 24 PRO Concealed magnetic catch

The PLS 24 PRO concealed magnetic catch from UNION is powerful, easy to install and can be used anywhere a roller/ball catch would normally be used.

The PLS 24 PRO is durable and won't wear out as there is no contact between parts. The Ezifit stainless steel housing cup automatically sets the magnets perfectly parallel to each other for precise power adjustment. Magnetic strength is set by inserting power adjustment packers as required to increase the holding strength.

The PLS 24 PRO is completely concealed when the door is closed - no unsightly protruding strike plate (unlike a roller/ball catch) while the self adhesive/magnetic brushed stainless steel cover plate protects magnets from impact damage and corrosion and conceals magnet and screw for a more attractive finish.

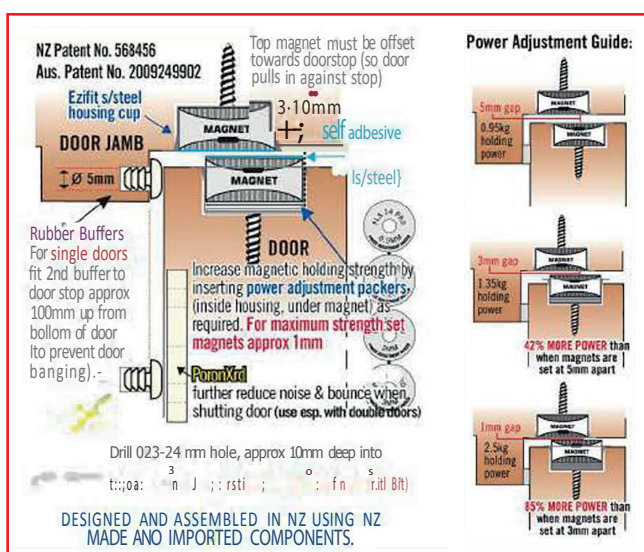

Range benefits

- **Suitable for use** on any doors and for any applications
- **No latch noise** when opening and shutting door (unlike a roller/ball catch)
- **Will never wear out** (magnets don't touch) and can be painted over
- **Lifetime guarantee**
- **Completely concealed** when door is closed
- **Keeps problem doors shut** (e.g. with weak door closers, electric strikes, wear roller mortice locks etc)
- **Quick and easy to install** - no chiselling required
- **Power adjustment packers** to adjust magnetic holding strength
- **Self adhesive/magnetic cover plate** protects magnets from impact damage and corrosion
- **Poron Xrd foam impact absorption pad** to further reduce impact noise when shutting door. Especially effective on double doors).

Ideal applications

Offices, factories, warehouses, hospitals, schools, leisure facilities and most other commercial buildings

Description	Finish	Unit qty	Boxed
24mm magnetic catch	SSS	1	PLS24PRO
24mm heavy duty magnetic catch	SSS	1	PLS24PRO-XHD
