

The Mortice Lock that's Trusted by Professionals

UNION StrongBOLT™ is expertly designed to provide both high security, and save time and money on installation. Top reasons to choose StrongBOLT™:

- Resistance against attack through the chamfered deadbolt, which provides a 38% stronger side load resistance than BS 3621 requirements (BS model).
- Prevents forced entry with anti-saw protection in the deadbolt, anti-pick keyhole protection and anti-drill plates (BS model).
- Eliminates the need for additional tooling or carpentry, StrongBOLT™ has the same footprint as many UK first fit doors.
- Radius inner forends for ease of first fit installation, or simple retro fit replacement.
- Tested to over 200,000 cycles and as a result, is guaranteed for 10 years.
