Safe, simple
to install and
versatile door
hold-open device

DoorSense Acoustic release hold-open device

DoorSense holds open fire doors for free movement around buildings. As the fire alarm sounds, the foot plunger automatically releases, allowing the door to close*.

CE Marked to 1155, EMC tested and fire rated for timber doors (FD120), DoorSense legally allows fire doors to be held open for easier access.

Quick and easy to install with no secondary installation costs such as electrical wiring, DoorSense retro fits existing products in the market.

Batteries and fixings are included.

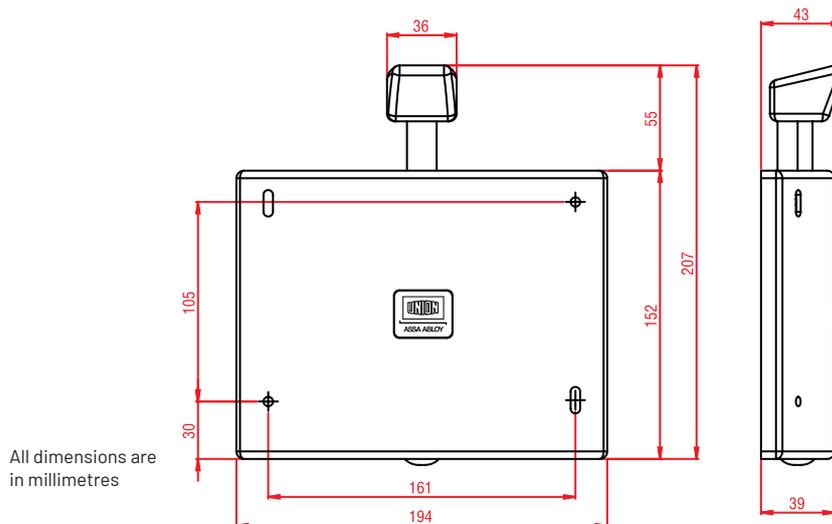

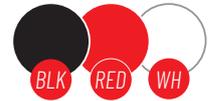

Range benefits

- **Acoustic release** door hold open device
- **Suitable for use** in conjunction with size 3 to size 7 door closers
- **Tested** over 50,000 times
- **Automatically releases** after loud sound; greater than 80 dB and longer than 15 seconds
